

Protection class

IP65

HT SERIES DISTRIBUTION BOX

Product Features

Manufactured from impact resistant polycarbonate or ABS, the AG, AT, PG, PT wall mounted electrical enclosures are suitable for use in demanding and harsh industrial environments. Self-tapping screw holes are provided on the bottom of the enclosure base for easy assembly and installation. The hinged hitch models can be fitted with hinges on either the long or short side. You can also choose the front plate or other various mounting accessories. This series of products are also used in the solar energy field and can be used as a convergence box.
